

- **MALDI-TOF and MALDI-TOF/TOF Mass Spectrometry – Basics and Applications**

Matrix-Assisted Laser Desorption/Ionization (MALDI) is a simple and straightforward ionization technique, most often coupled to TOF mass analyzers for fast mass spectrometric analysis. In this webinar you will learn what MALDI is, how it works and a variety of the many applications it can be used for. This webinar is for scientists with little or no prior experience with MALDI. After the introduction to MALDI an overview of applications served by this ionization technique will be given.
