

# Bruker UK MS Update 2021 - Products, Applications and Customer Insights

Webinar

June 29, 2021, 09:00 - 12:45 am BST

**Products, Applications and Customer Insights, June 29, 2021,  
09.00 - 12.45 BST**

**Program:**

- |                      |                                                                                                                                                                                                           |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>09:00 - 09:15</b> | <b>Welcome and Introduction</b><br>Mark Churchill, Angela Paul, Bruker UK                                                                                                                                 |
| <b>09:15 - 09:45</b> | <b>Expanding the Horizons of Single Cell Research</b><br>Angela Paul, Bruker UK                                                                                                                           |
| <b>09:45 - 10:15</b> | <b>Proteomics goes forensics</b><br>Simona Francese, Ph.D., Centre for Mass Spectrometry Imaging,<br>Biomolecular Science Research Centre, Sheffield, UK                                                  |
| <b>10:15 - 10:45</b> | <b>diaPASEF: Technical concepts, libraries, and application in<br/>cardiomyopathy</b><br>Ben Collins, Ph.D., Queen's University Belfast, School of Biological<br>Sciences, Belfast, Northern Ireland      |
| <b>10:45 - 11:15</b> | <b>High throughput and high sensitivity – standardized with Evosep One<br/>on timsTOF Pro</b><br>Nicolai Bache, EVOSEP, Odense, Denmark                                                                   |
| <b>11:15 - 11:30</b> | <b>Expanding the Horizons of small molecule research - a recap from<br/>Brukers small molecule eXceed symposium</b><br>Dr. Sven Meyer, Bruker Daltonics GmbH & Co. KG, Germany                            |
| <b>11:30 - 12:00</b> | <b>Metabolomics and lipidomics as a research and diagnostic tool for<br/>inborn errors of metabolism</b><br>Frédéric Maxime Vaz, Ph.D., Amsterdam UMC, Academic Medical Center,<br>Amsterdam, Netherlands |
| <b>12:00 - 12:30</b> | <b>Cellular phenotypic drug discovery assays using MALDI TOF mass<br/>spectrometry</b><br>Prof. Matthias Trost, Newcastle University, Faculty of Medical Sciences,<br>Newcastle, UK                       |
| <b>12:30 - 12:45</b> | <b>Meet the Experts</b>                                                                                                                                                                                   |
