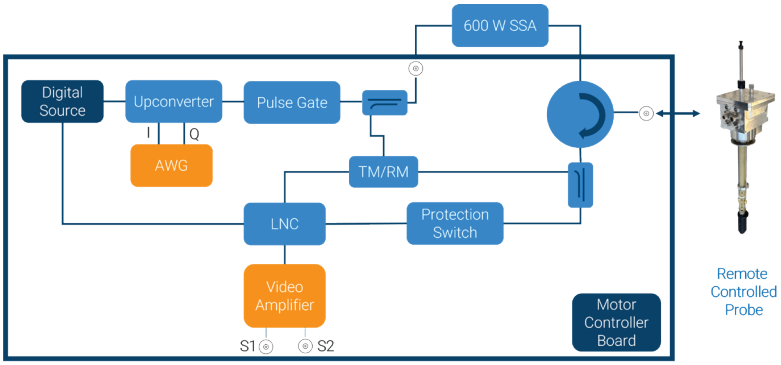
EPR

A New Avenue for Advanced Pulse EPR

Introducing the New X FT-AWG Bridge for the ELEXSYS E580

- **Streamlined, pulse-only bridge architecture:** A single AWG drives all pulse generation, cutting hardware costs
- **Chirped pulse tuning and new predefined shapes in Xepr:** Faster setup, more experimental freedom
- **Motorized probehead:** Remote, computer-controlled tuning for consistent, reproducible results



Simplified block diagram of the new X FT-AWG bridge for ELEXSYS E580 systems.
