1 Product Description

SDHB is a mixture of 2,5-dihydroxybenzoic acid (2,5-DHB) and 2-hydroxy-5-methoxybenzoic acid. We recommend using SDHB MALDI matrix for MALDI-TOF-MS analysis of very large proteins and glycoproteins instead of 2,5-DHB.

SDHB is also suitable for the generation of ISD spectra of intact proteins and for use on AnchorChip™ MALDI targets.

For preparation protocols, see the *Instructions for Use: Bruker Guide to MALDI Sample Preparation* (Product Number # 8702557), which is available for download at www.bruker.com/ifu.
