ASMS 2020 unveiled : taking 4D-Proteomics™ to the next level

Join us to learn how proteomics analysis on the timsTOF platform has been improved further with increased LFQ and dia-PASEF® performance and the introduction of prm-PASEF® and real-time search.

You will also discover how the unprecedented combination of speed, sensitivity, selectivity and robustness have been exploited by our users to take on demanding proteomics challenges.
