How to export PV360 data to Bruker Support

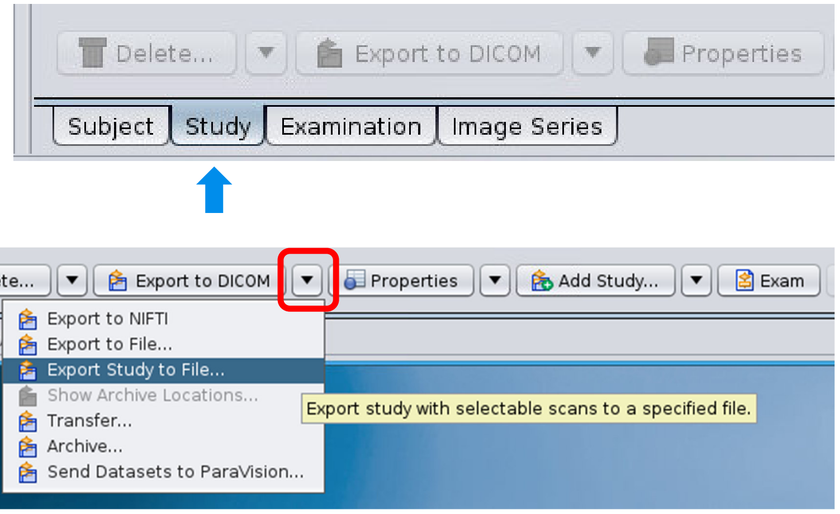
1/Export entire study or a selection of scans within a study

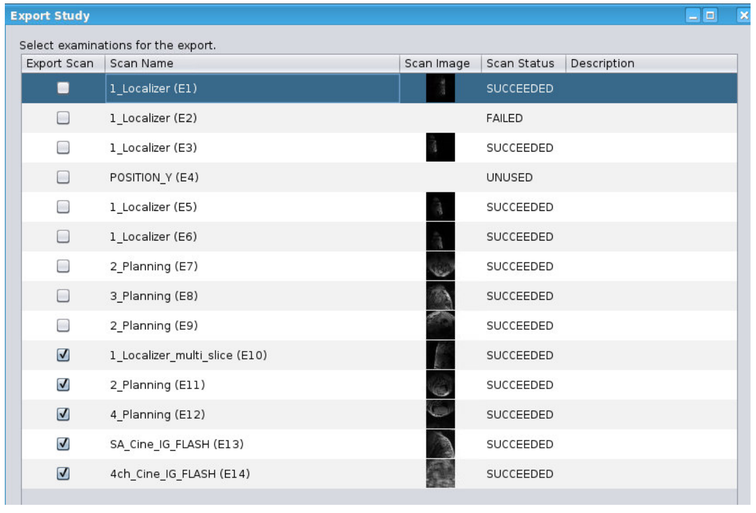
- Open the “Dataset Browser” (Menu: Window > Dataset Browser)
- Select the study to be exported from the Study subcard.
- Select the drop-down right of “Export to DICOM”

Either choose “Export to File” to export the entire study

or “Export Study to File” to export only a selection of scans

- Select the relevant Scans, including:
  - a Localizer
  - B0 map, if acquired (must be manually selected)





2/Upload data

- Upload file: https://fileshare-bbio.bruker.com/bbio-upload
- Please inform us of the filename (can be edited from default)

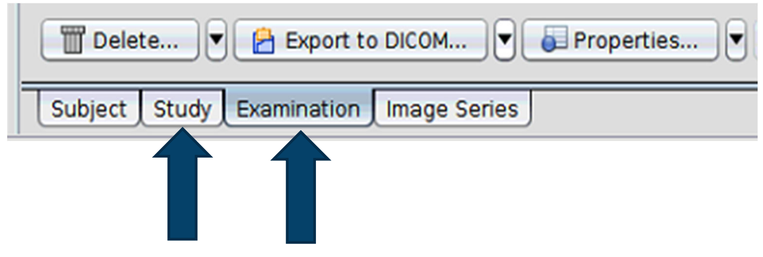
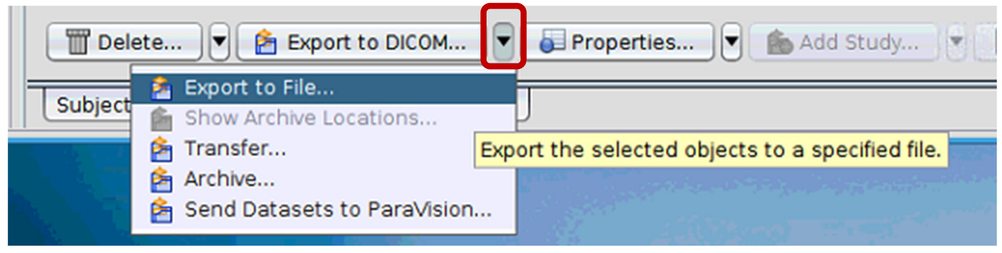
How to export PV6 and PV7 data to Bruker Support

1/Export entire study or single examination



- Open the "Dataset Browser" (Menu Window → Dataset Browser)
- Select the data to be archived from the Study or Examination subcards. Do NOT select Image Series subcard because useful parameters will be lost
- Select the drop-down right of "Export to DICOM" and switch to "Export to File"
- Location and file name can be edited from default



2/Upload data

- Upload file: https://fileshare-bbio.bruker.com/bbio-upload
- Please inform us of the filename
